

SMART WATER FOUNTAIN

USER'S GUIDE

ASSEMBLY

Touch button:

- Press to turn Smart Water Fountain on
- Press again to switch Drinking Mode
- Press and hold to turn off

Window light:

- **Blue light** indicates normal water level
- **Red light** indicates low water level. Refill water.
- Flashing **blue light** reminds to replace the filter

Low water level protection:

- Smart Water Fountain automatically turns water pump off
- Restarts water pump, when water level will become normal

Fountain's waterproof level:

- you can wash whole device **after taking AC adapter out**

DRINKING MODES

NORMAL MODE: default mode - water flows continuously

SMART MODE: water flows for 30 seconds with 30 minutes pause

FABCY MODE: water flows 1-10 seconds with 1-10 seconds pause

FILTER

- **Activated zeolite** screens and effectively removes dangerous both for people and all animals heavy metals: lead, mercury, iron, fluorine and other heavy metal ions from water.
- **Activated carbon** is very effective in removing at least 81 chemicals, effective in another 30 and moderately effective for 22. It also removes bad tastes and odors.
- **Ceramic filter** clears water and fully removes residual chlorine. Chlorine increases risk of cancer, damages cells, can result heart problems, etc.
- **Calcium sulfate** exterminates bacteria in water your pet drinks. These bacteria could be dangerous for every living organism and lead to different health problems.

Don't forget to replace filter on time:

NORMAL MODE: 1 month

SMART MODE: 3 months

FANCY MODE: 1.5 months

Take flashing blue window light as standard.

How to replace:
Replace filter and reset fountain's settings.

How to reset fountain's settings:
Press and hold touch button until you'll hear quick ticking.

CLEANING

Clean and wash fountain's parts every week, or if you see it is dirty.

Unplug AC adapter every time you clean Smart Water Fountain. You can gently move water pump when cleaning. **Don't pull pump's wire!** The filter can be washed only with plain water; never use any detergents or something similar. After cleaning put all parts and pump cotton in right position.

QUICK GUIDE

1 UNPACK

Open the box and take out filter tray, filter and mesh. Wash them carefully.

2 TURN ON

Connect AC adapter with Smart Water Fountain.

3 ASSEMBLE

Assemble Smart Water Fountain according its structure (see image below). **Important:** put rotary buckles in position; pay attention to "this side up" lettering on the filter.

4 FILL WITH WATER

Pour water in fountain's "mouth". Water level should be below "max water level". **Red light** indicates low water level.

5 START

Press touch button to turn Smart Water Fountain on.

HEALTH TIPS FOR CATS

Normal intake of water for cats is 6% of its weight. It is approximately 20ml/kg. In summer or after physical activities this amount increases.

Cats love to drink clean and fresh water. Cats hate stagnant water. That's why you can see them drinking from the tap.

Cats love clean and quite places. That's why you shouldn't place water near trash can or in the aisle.

Cats need to drink only plain water without adding any beverage ingredients.

HEALTH TIPS FOR DOGS

Usually, an adult dog needs 120ml/kg of water per day. Puppies need about 160ml/kg per day. In summer or after physical activities this amount increases.

You shouldn't limit your dog's water consumption. Demand in water is way more important than food. Dog will be agitated when is thirsty, could lose appetite.

If your dog drinks a lot of water, don't worry. If your dog looks happy and eats well, it is not an issue. A lot of physical activities need more water to accelerate metabolism.

Lack of water for a long time, could lead to dry eyes, rough skin elasticity or blood circulation disorders, or even death :(

Dog's normal water demands:

- 8 kg dog 1 tank / 2 days
- 15 kg dog 1 tank / day
- 30 kg dog 2 tanks/ day

SPECIFICATION

Material: FDA certified ABS plastic

Weight: 0.8 kg

Water capacity: 3L

Filter mesh water capacity: 0.4L

Diameter: 25 cm

Height: DC 12V

Power: 1.5W

AC adapter output: 12V, 0.5A

AC adapter input: 110V-220V

Box size: 302x297x155 mm

Box content:

- AC adapter
- Filter
- User's guide

Caution!

- indoors use only
- place horizontal
- unplug AC adapter before cleaning
- regularly clean fountain's parts
